

Exciting Opportunity in a non-traditional healthcare position!

Currently seeking a Nurse Practitioner, PA, or RN for the position of Electronic Health Record (EHR) Software Quality Assurance Engineer in Carrollton, TX. The EHR Software Quality Assurance Engineer applies healthcare knowledge and experience to the testing of EHR software in order to ensure that the software functions as designed and meets the requirements of clinical users.

The primary responsibility of the Software Quality Assurance Engineer is to perform validation and verification testing on assigned areas of the software application and adhere to stringent deliverable deadlines. This role works closely with the product managers to ensure implementation of robust product design, and software life cycle procedures. You will assist in development and review user, product, and software requirements. In addition, you will develop and write risk analysis and quality plans for projects.

This position requires a strong clinical background in multi-specialty settings as well as experience with electronic medical records. You should have good analytical ability and strong computer skills. You must have strong communication skills, and work well as a team in a fast-paced environment. If you have a passion for technology, and would like to move into an exciting career in healthcare information technology, please forward your resume to dhernandez@imedica.com.
