

Install and Run Instructions for SpyBot Search and Destroy

1. Copy or Download the Spybot executable to your local machine from an email from ITS, or by going to <http://www.safer-networking.org>.
2. Double click to run spybotsd12.exe.
3. Click Next, Accept, Next, Next (Full Installation), Next, deselect Create Desktop icon and Create a Quick Launch icon and then choose Next.
4. Choose Install, and then Finish.

To Run:

1. Go to Start, All Programs, Spybot Search and Destroy
2. Choose Spybot S&D (easy mode)
3. Choose English
4. On Legal Stuff window, check Don't show again, and OK.
5. Choose Check for Problems
6. Choose Fix Selected Problems when Spybot has finished its search.
7. Answer Yes.
8. When all green checks are returned you are finished and can close the program.

To Run again in the future, follow the above steps, but please click the Update button on the main console screen, then choose Download Updates (while connected to the internet).
