

Installation Instructions for the UNT LDAP Address Book

(You must be running Windows XP to use this application)

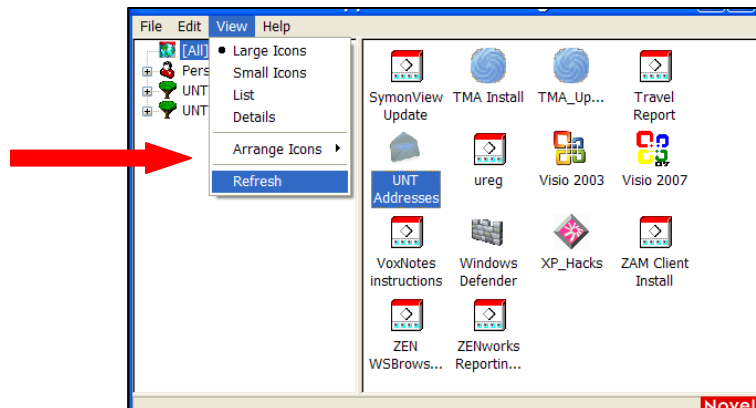

1. Open your Novell Delivered Applications running down next to your Start button.

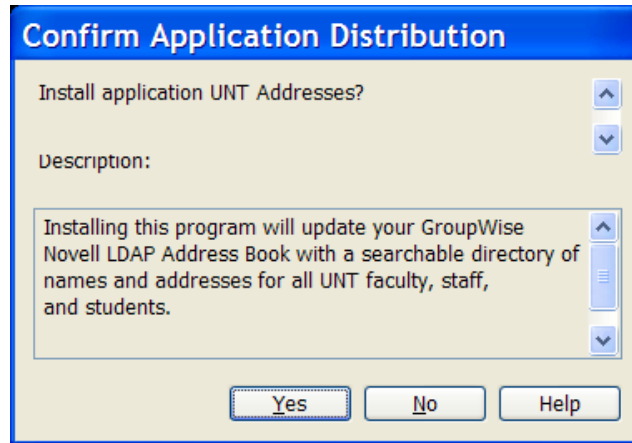

2. Find the envelope icon labeled UNT Addresses, and double click to begin.

(If you do not immediately see the UNT Addresses icon, click View, Refresh for it to appear. If the icon does not appear, and the label UNT Addresses does, go ahead and run the application).

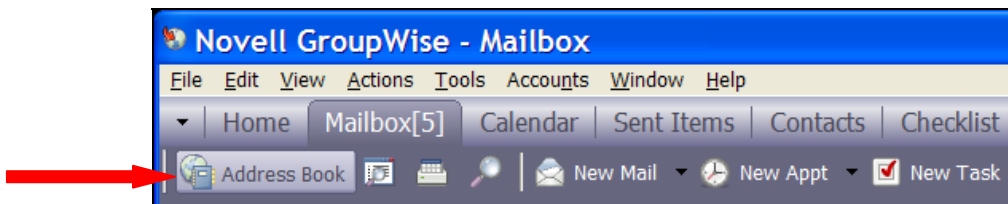

3. You will see a confirm installation window, click Yes to continue.

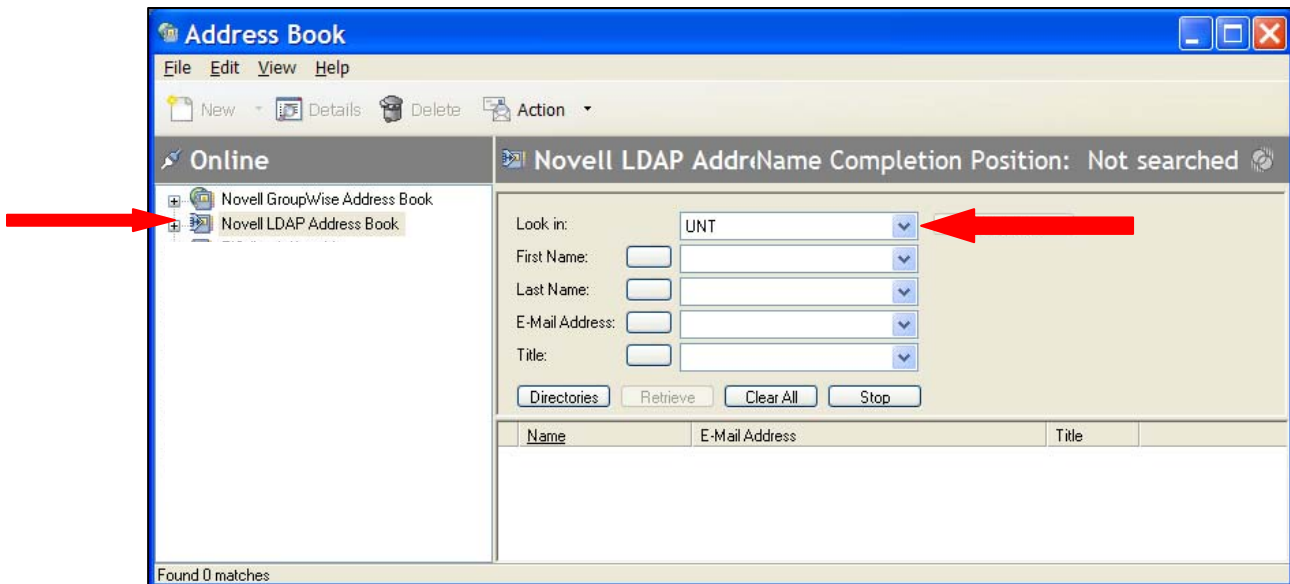

4. The install will take seconds and you will not see any noticeable difference until you look in your GroupWise Address Book.

5. To verify that the installation completed successfully, open your GroupWise Address Book.

6. Click on the Novell LDAP Address Book, and you should now see "Look in: UNT"

Please see the UNT LDAP Address Book Guide for instructions on using this address book.
