

# **Gas Cylinder Safety Rules**

**1. ALL tanks must be secured with a tank tie-down in the lab. (NO EXCEPTIONS)**

**2. Tanks may ONLY be transported with a securely tightened metal cap (so keep track of your lab's tank caps).**

**3. Tanks may ONLY be transported with an approved cart which has a strap or chain to immobilize the tank.**

**\*Failure to follow these 3 simple safety rules can result in stiff fines from the Safety Office!**
