

SCImago Journal & Country Rank (SJR) has released citation data for 2009. The figure below depicts the impact factors for *Osteopathic Medicine and Primary Care* (OMPC), the *Journal of the American Osteopathic Association* (JAOA), and the *International Journal of Osteopathic Medicine* (IJOM) over time.

We are pleased to report that *Osteopathic Medicine and Primary Care* has achieved the highest impact factor among these osteopathic journals in the first year during which it was eligible to receive an impact factor! The 2009 impact factor is based on the total number of times that the journal's articles published during 2007-2008 were cited by journals in 2009. *Osteopathic Medicine and Primary Care* began publishing in 2007. The methodology used by SJR plots the 2009 impact factor in the year 2008 because it reflects the impact of the journal's articles that appeared in the 2007-2008 biennium.
